## Our Course is Unique

Based on our training experience we have found hands-on training does not optimize the learning experience. When everyone has a computer, it takes five times longer to cover the same material and there never is enough time to answer everyone's questions. To cover as much material as we do, the course has to move along at a good pace. Therefore, we do the typing... and you do the learning. Our format ensures that you'll learn the maximum amount of material with the smallest investment of time. The instructor's computer image is shown on a large screen. Upon check-in for the course, participants receive a detailed workbook. This enables them to follow along and take notes in their workbook. Using our format, there's plenty of time to answer all participant questions and cover all the material in just 2 days! **During the course the instructor stays until every participant's questions are answered to be sure they are doing things right. We encourage you to bring your laptop to the Course.**
